at: www.iamot2011.org, FOR DETAILED INSTRUCTIONS ON REGISTRATION, THE
REQUIREMENTS AND SUBMISSION OF ABSTRACTS AND FULL PAPERS and FOR
INFORMATION ON THE VENUE**

Conference Focus

The IAMOT 2011 Conference will focus on the technology contribution in solving the world's *emerging and contemporary* challenges. Without a doubt the world is experiencing unprecedented problems of considerable impact on our lives. From safety and security issues, to economic recession, to population explosion, to energy and water shortages, to global warming and natural disasters; world leaders are turning to the technology for solutions.

All are signs of the of the time that the “flat” world is experiencing as a result of virtual close proximity between nations and the technological breakthroughs in communications, computing, Science, transportation, and medicine, among others. MOT 360-thinking, tools, systems and policies are needed across temporal, geographical, government, businesses and industries. In many ways, these are MOT grand challenges for this decade and beyond.

The conference will address issues related to MOT Education, R&D, technology transfer, and theory of technology, open Innovation and emerging technologies that contribute to solving the global challenges. Additional tracks to our traditional tracks have been added to IAMOT 2011 program, and others are solicited from the membership.

Who Should Participate

- Presidents and Chief Executive Officers
- Vice-Presidents of Corporations
- Economists
- Entrepreneurs and Technology Innovators
